

To the CGA ,

I have been a lawful gun owner and permit holder in CT for 20 years. Over this period of time , it has become quite clear that this government will never halt its efforts to marginalize, harass, and punish the unprotected minority class of gun owners of this state, until they are finally stripped of their arms and ammunition.

It is equally clear that arguing the finer points of draconian proposals with a panel of mostly Marxist-leaning politicians is a foolish waste of time - prior experience has shown. When government breaks its constitutional constraints and becomes progressively careless and lawless towards its citizens , so to will the citizens become lawless.

Just as the minority class of righteous gun owners has been repeatedly abused, disregarded and disrespected by this government , the citizen gun owners of this state may very well disregard this government , and disregard its acts as illegal and illegitimate as they pertain to the People's undeniable rights to arms.

When a minority class of People have essentially lost their representation in all Three Branches of their government , what recourse do they have left but to live free by defying those laws that bind them?

When government treats the lawful as the lawless , it is in fact government itself that has become lawless through its own hubris and tyrannical actions - and delegitimization soon follows.

May God Bless CT...

With sincere concern for our future,

Robert Steed
